## Why use the Aromatic Drain Device?

- *Eliminates gas and foul odors immediately*
- *Cleans drain lines and dissolves grease*
- *Eliminates fruit flies*
- *Lasts 1 month, works 24 hours a day 7 days a week*

## What is the Aromatic Drain Device?

The Aromatic Drain Device contains a powerful and fragrant block that will eliminate gas and foul odors from your drains.

The drain refill blocks are made of a custom formulation combining bacterial strains with industrial strength fragrances and cleaners. The block is designed to last thirty days, allowing for continuous treatment of drains over that one month period.

Wetting the blocks provides additional release of the bacteria to clean and maintain the drain lines.

Blocks are biological rather than chemical; they are non-corrosive and will not damage pipes or drains. Blocks are completely safe for people and the environment..

The Aromatic Drain Device also eliminates fruit flies, which can be almost impossible to control.

Drain  
Device

- Basket
- Biological block

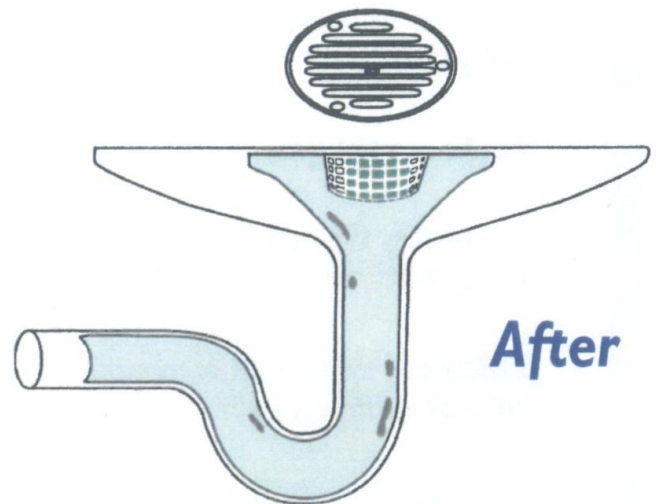

## How does it work?

Before

Organisms released from the aromatic blocks adhere to drain walls and begin to break down built-up organics, which are the source of bad odors and cause of slow drains.

After

Exposure to water provides additional release of the bacteria to clean and maintain drain lines.
